

MON88017 x MON810

The event MON810 produces a Bt toxin against lepidoptera (European stemborer and other moths/butterflies); MON88017 is a stacked event with glyphosate herbicide tolerance and a Bt toxin against coleoptera (corn root worm and other beetles).

As an F1 hybrid of two deregulated GMOs it is not regulated in the US. MON88017 x MON810 has environmental, food and feed approvals in a number of countries, mainly in Asia and in Mexico.
